    While the country covers an area of approximately 90,000 square kilometers, only 298 square kilometers of
    that is dry land. The islands are grouped into a double chain of 26 atolls.
    The country's unique geography mesmerizes the visitor. Reefs that offer bands of color,
    tiny jewel-like islands rimmed with the whitest of soft sand surrounded by the clearest shallow
    waters that one can imagine. Only 200 of the islands are inhabited, and a select few on each of
    the atolls are resorts and some of the islands are used for industry and agriculture.

About Us

The Maldives is a nation of islands in the Indian Ocean, that spans across the equator. The country is comprised of 1192 islands that stretch along a length of 871 kilometers. While the country covers an area of approximately 90,000 square kilometers, only 298 square kilometers of that is dry land. The islands are grouped into a double chain of 26 atolls. The country's unique geography mesmerizes the visitor. Reefs that offer bands of color, tiny jewel-like islands rimmed with the whitest of soft sand surrounded by the clearest shallow waters that one can imagine. Only 200 of the islands are inhabited, and a select few on each of the atolls are resorts and some of the islands are used for industry and agriculture.
